

# Scaling and Dehairing Machine

## KFS-2-120

For calve / cattle / sheep heads, calve- and cattle feets / ox-muzzles / sucking pigs

### Technical specifications:

Length:	1550 mm
Width:	940 mm
Height:	1280 mm
Motor:	2.2 kW / 5.2 A
Voltage:	x 380 V / 50 Hz / 16 A
Water connection:	+ 72° C / ¾"
Water consumption:	ca. 24-36 lt / min.
Weight:	590 Kg

### Capacity:

Calves heads:	ca. 60 - 100 pieces / hour
Calves feets:	ca. 200 - 240 pieces / hour
Ox-muzzles:	ca. 120 - 150 pieces / hour
Cattle heads:	ca. 30-40 pieces / hour
Sucking pigs:	ca. 100 - 200 pieces / hour

The scalding and dehairing machine KFS-2 scalds and dehairsts very gently, absolutely clean, without the addition of "unhygienic claws", which are necessary for dehairing at various machine manufacturers.

The new development has also resulted in very low wear of the new rubber scrapers. The KFS-2 works absolutely hygienically and imposes itself on every modern slaughterhouse.

**The following points distinguish the KFS-2-120**

- Housing, working rake and sliding lid completely made of stainless steel
- Double roller cleaning
- Integrated nozzle spray system
- Brewing water outlet
- 4 height adjustable feet
- separate control box

Ox-muzzles

Calve feet

Calve heads

Ox-muzzles
