Solutions for Professional Food Processing

## **Welcome to KT's 75<sup>th</sup> anniversary catalogue.**

KONETEOLLISUUS OY is a family-owned company specialized in manufacturing food processing machinery. The year 2013 marks two anniversaries: the founding of Kone-teollisuus 75 years ago by Huvi Akrenius and the founder's birth 100 years ago.

Ever since the beginning, the core focus at Koneteollisuus has been to produce high quality machines that focus on the essential aspects of use and are built to last. The work of Huvi has been continued by his five sons, internationalizing the firm, and the 3<sup>rd</sup> generation with new ideas has joined the family business.

We hope you find what you are looking for on the following pages, and in case any questions arise, do not hesitate to contact us at [akrenius@koneteollisuus.fi](mailto:akrenius@koneteollisuus.fi).
